Industrial Media Converter with maximum flexibility and bandwidth with minimum dimensions

UBF provides an Industrial Gigabit Ethernet Media Converter, mountable on 35mm DIN rail.

With 26x95x75mm (WxHxD) it is small, but belongs to the big ones in terms of performance and flexibility.

The compact media converter in rugged metal case has an RJ-45 port for 10MBit/s Ethernet, 100MBit/s Fast Ethernet or 1000MBit/s Gigabit Ethernet and a dual speed SFP slot for 100MBit/s Fast Ethernet or 1000MBit/s Gigabit Ethernet SFP modules.

This allows the media converter to be used whenever copper cable meets fiber cable. The type of connection is determined by selection of the SFP module. There is no more need for space-consuming storing of diverse media converters as spare parts.

Possible connections:

RJ-45 10/100/1000MBit/s
fiber optic 100/1000Mbit/s depending on SFP module
frame size max. 10KBytes Jumbo Frames
SFPs Fast Ethernet
Gigabit Ethernet
multimode
singlemode/monomode
multimode BiDi/WDM
singlemode BiDi/WDM
CWDM
DWDM
optical polymer fibers (POF)
